1. Including HoistSpar and sustainability

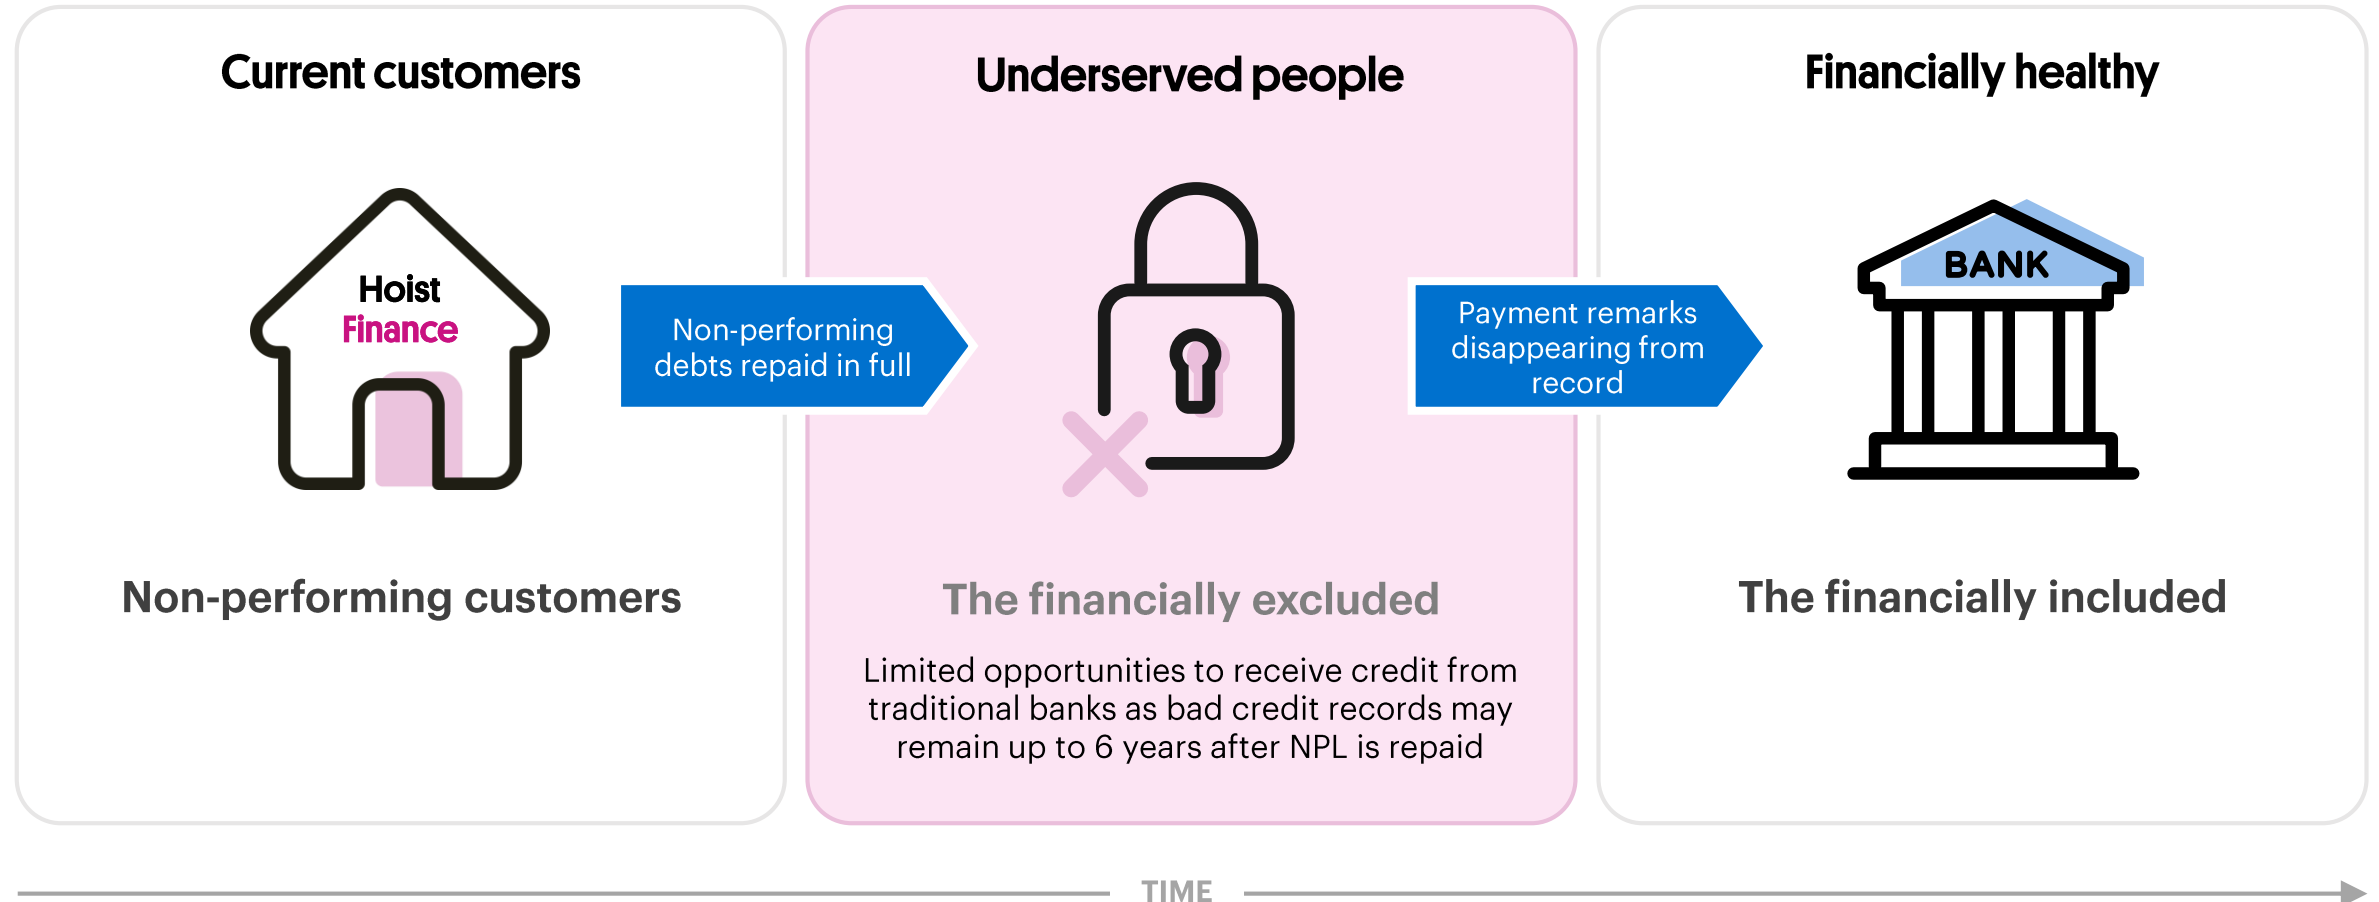

Klaudia and Julia, Wroclaw

With our banking platform and key capabilities we can develop our customer support

Clear potential identified in targeting the financially excluded

All product areas can deliver significant value to the core business

Current customers

- » Budgeting
- » Job support
- » Utility bill switching
- » Benefit checker

Supporting facts: 75% of customers in Poland are interested in receiving **help** from Hoist (e.g., budgeting, job support)

Underserved people

- » Complementary banking products
- » Debt consolidation/ refinancing
- » Refer back to universal banks
- » Portfolio acquisitions from exiting banks

Supporting facts: 60% of France customers would be interested in receiving **financial help** once the debt is paid off

Key building blocks

- » Performing loans
- » Deposit funding
- » Credit risk modelling
- » Analytics
- » Data sourcing

Supporting facts: Large global market appetite for risk analytics and business intelligence

And we can bring more value to our customers

”

To repay the loan I took before I got sick and lost my job, I need help in identifying the benefits I am entitled to.

- Maria

”

I need a loan to repair my car, but even though I have repaid my debt, I still have a payment credit remark.

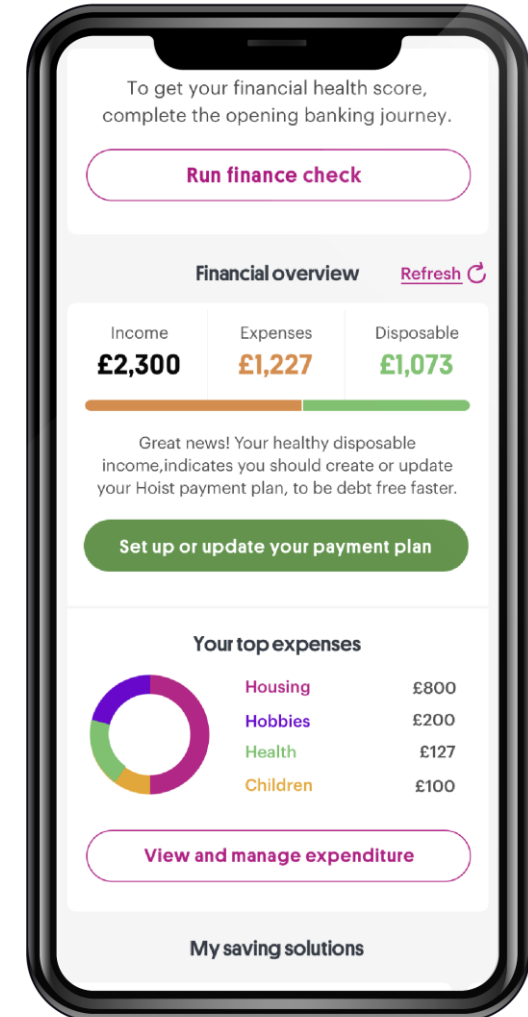

- Henry

”

One of my problems is that I have irregular income. Furthermore I have debts with several different lenders.

- Béatrice

Hoist Finance

Capital Markets Day 2021

The big picture from an investment perspective

- » Long and **strong track record**, with resilient performance in time of crisis
- » **Lowest funding cost** in industry, with funding advantage expected to increase even further
- » **Diversified growth** via continued expansion into new asset classes
- » **Securitisation solution** to address regulatory challenges, and IRB to provide further upside
- » In pole position for **market opportunity** with growing volume and returns

Our track record of forecasting collections is strong

Annual actual cash vs. initial forecast, cumulative, secured & unsecured
SEK billion

Our book has proven to be resilient in times of crisis

Hoist Finance NPL book since 2007

Cash collections as % of initial forecast 2007-2020

- » Collections performance since 2007 demonstrates resilience in times of macroeconomic distress
- » After the global financial crisis of 2008, performance bounced back quickly and strongly
- » Following the Covid-19 pandemic, expect rebound similar to 2009, as new credit cycle commences

Growth slowed in 2020, but backlog is building up

Cumulative purchase price of acquired debt portfolios EUR billion

Note: Annual purchases converted at average exchange rate for respective year
SOURCE: Financial reports

Our industry is largely financed with bonds

Outstanding bond issues EUR billion

Note: Bonds, net of repurchases. Annual issues converted at average exchange rate for respective year
SOURCE: Company data

The cycle is turning and margins are increasing

12 month effective interest rate¹

- » Until 2018: Continuously lower funding costs in bond market led to significant IRR compression as market players strived for continuous growth
- » 2019: Trend in the bond markets starts to reverse with focus shifting toward leverage reduction
- » 2020: Covid-19 crisis increases uncertainty and drove spread widening, which ultimately will get passed on to sellers in the form of increased return requirements

1. LTM (last twelve months) weighted average effective interest rate, EIR (gross IRR), non-performing loans

Lowest cost of funding in the industry

Weighted Average Cost of Debt (WACD)¹

- » Funding mix also means we are less impacted by increases in bond funding spreads
- » Expect our funding advantage to increase even further, as turn of cycle will lead to increased funding costs for our mainly bond funded peers

1. Q3 2020
SOURCE: Company data / Financial reports

Continued diversification into new asset classes

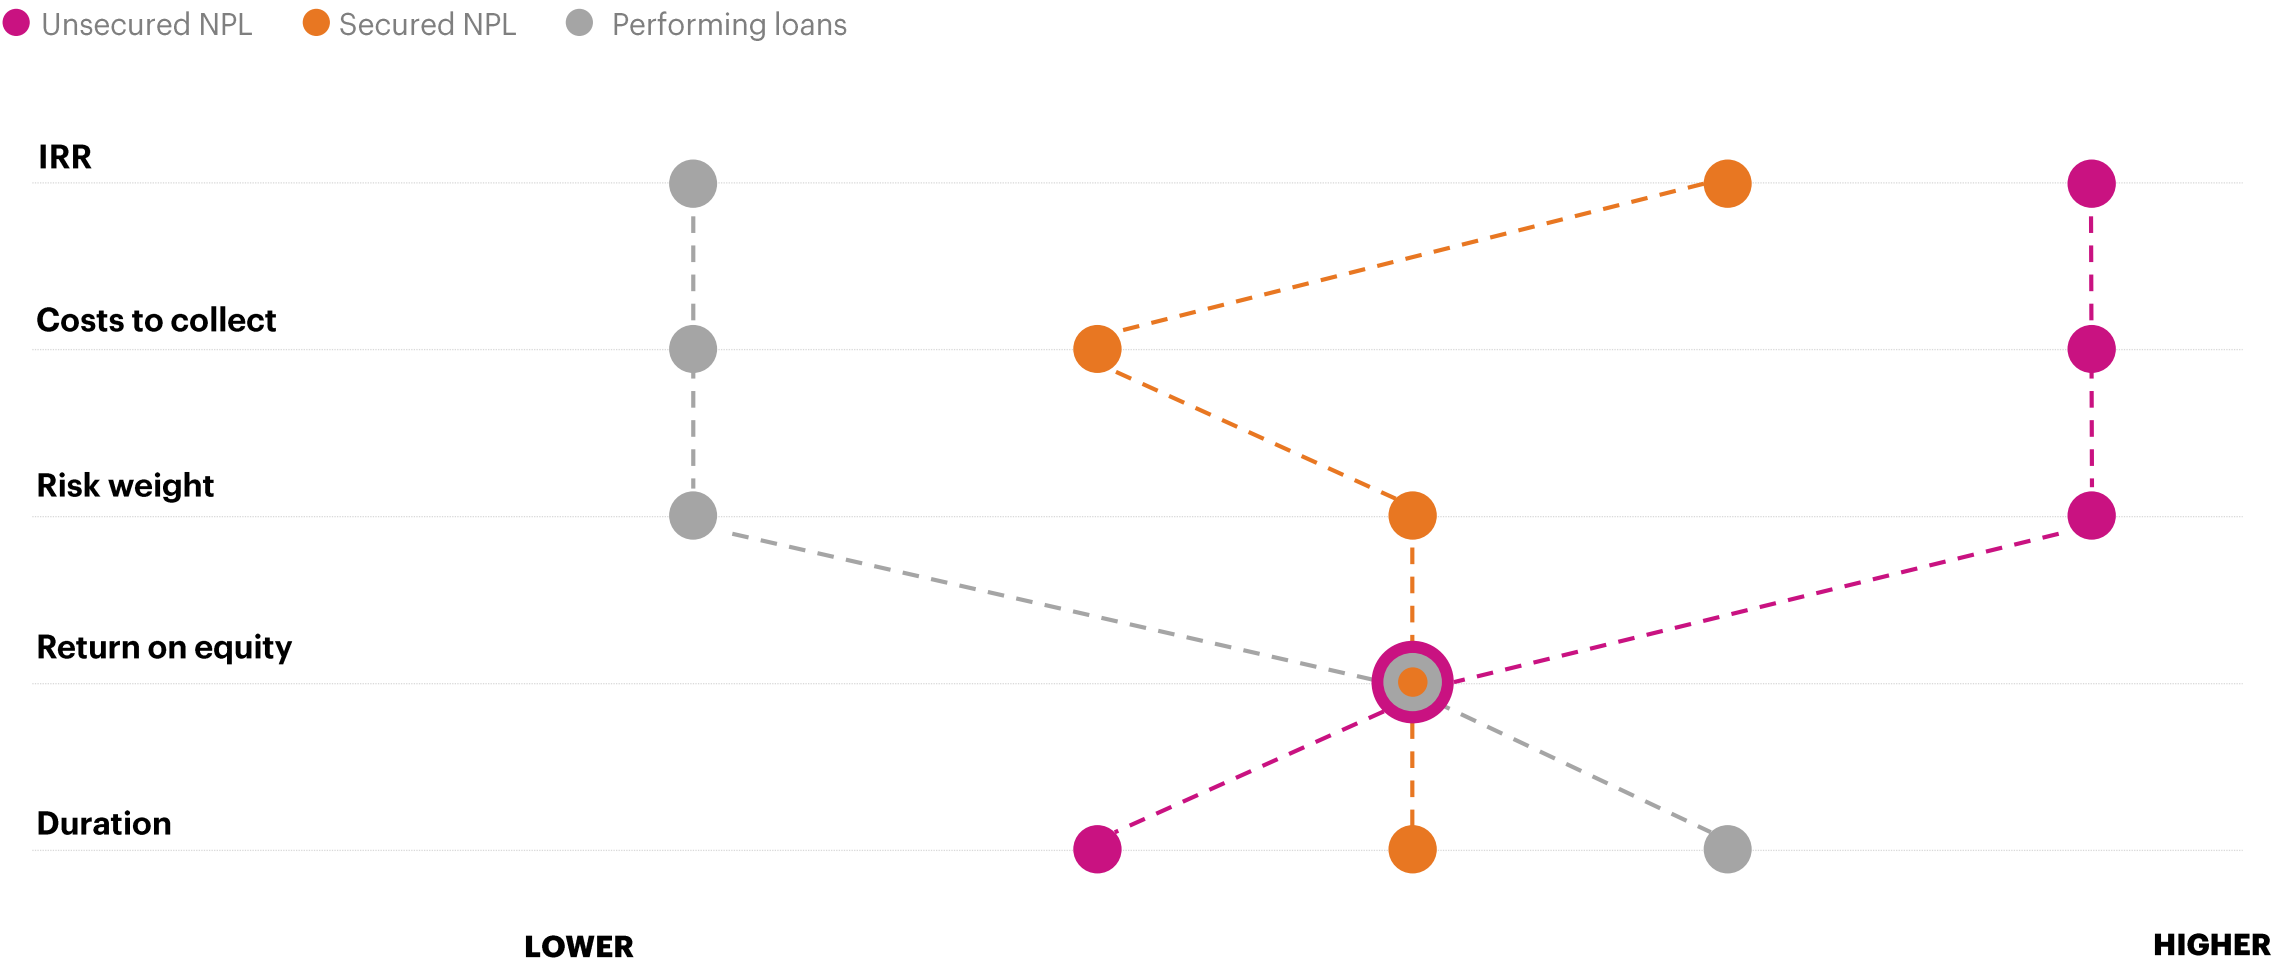

Annual acquisition volumes by asset class SEK billion

- » Start to diversify into secured NPL space in 2016
- » 2018 and 2019 growth years for secured businesses in Italy and France
- » Market activity slowed in 2020, due to the pandemic, but expect to continue growth of our new asset classes in 2021-23

Different asset classes with very different characteristics

Asset characteristics

SOURCE: Internal and external benchmarking

Diversified book even more robust and profitable

Book value development

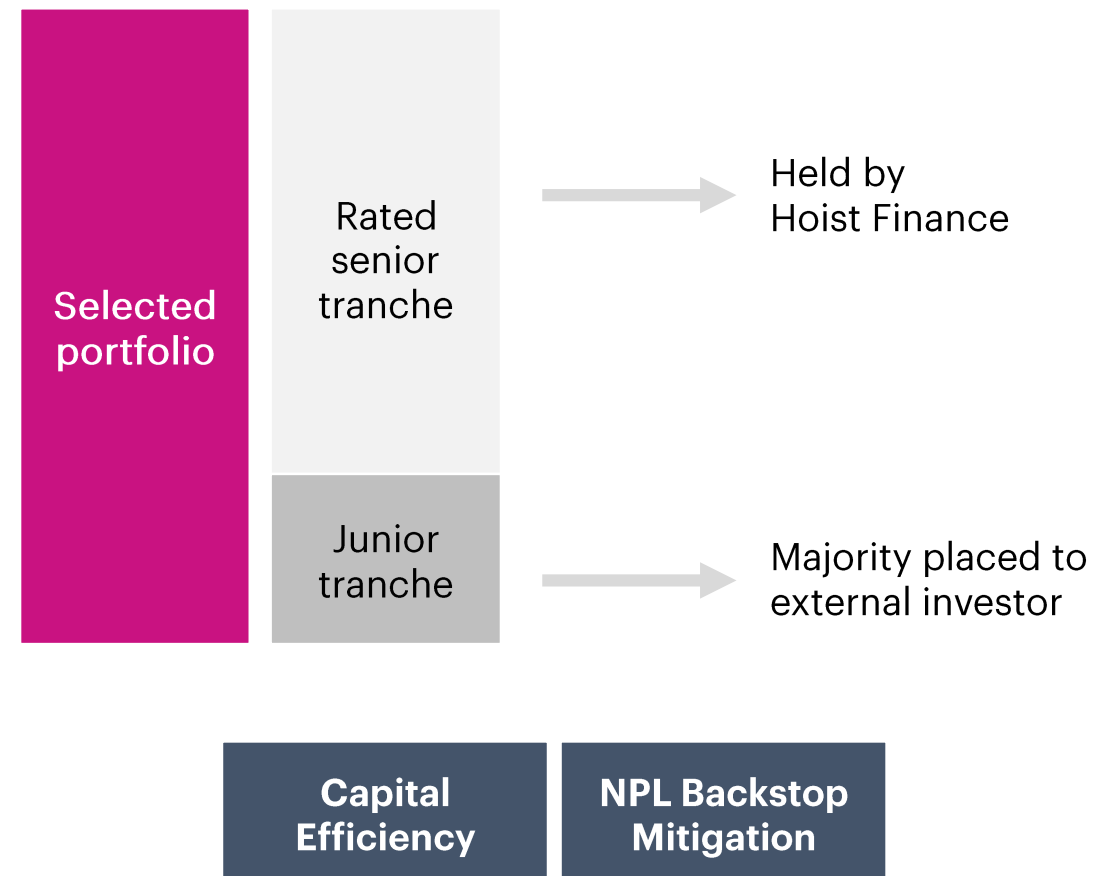

- » Unsecured NPLs to remain a core part of our business
- » Strong growth in secured NPL and performing asset classes to change the composition of our book
- » Resulting increase in diversification to lead to more robust and even more profitable book

Securitisation as solution to regulatory challenges

First ever rated securitisation backed only by unsecured NPLs

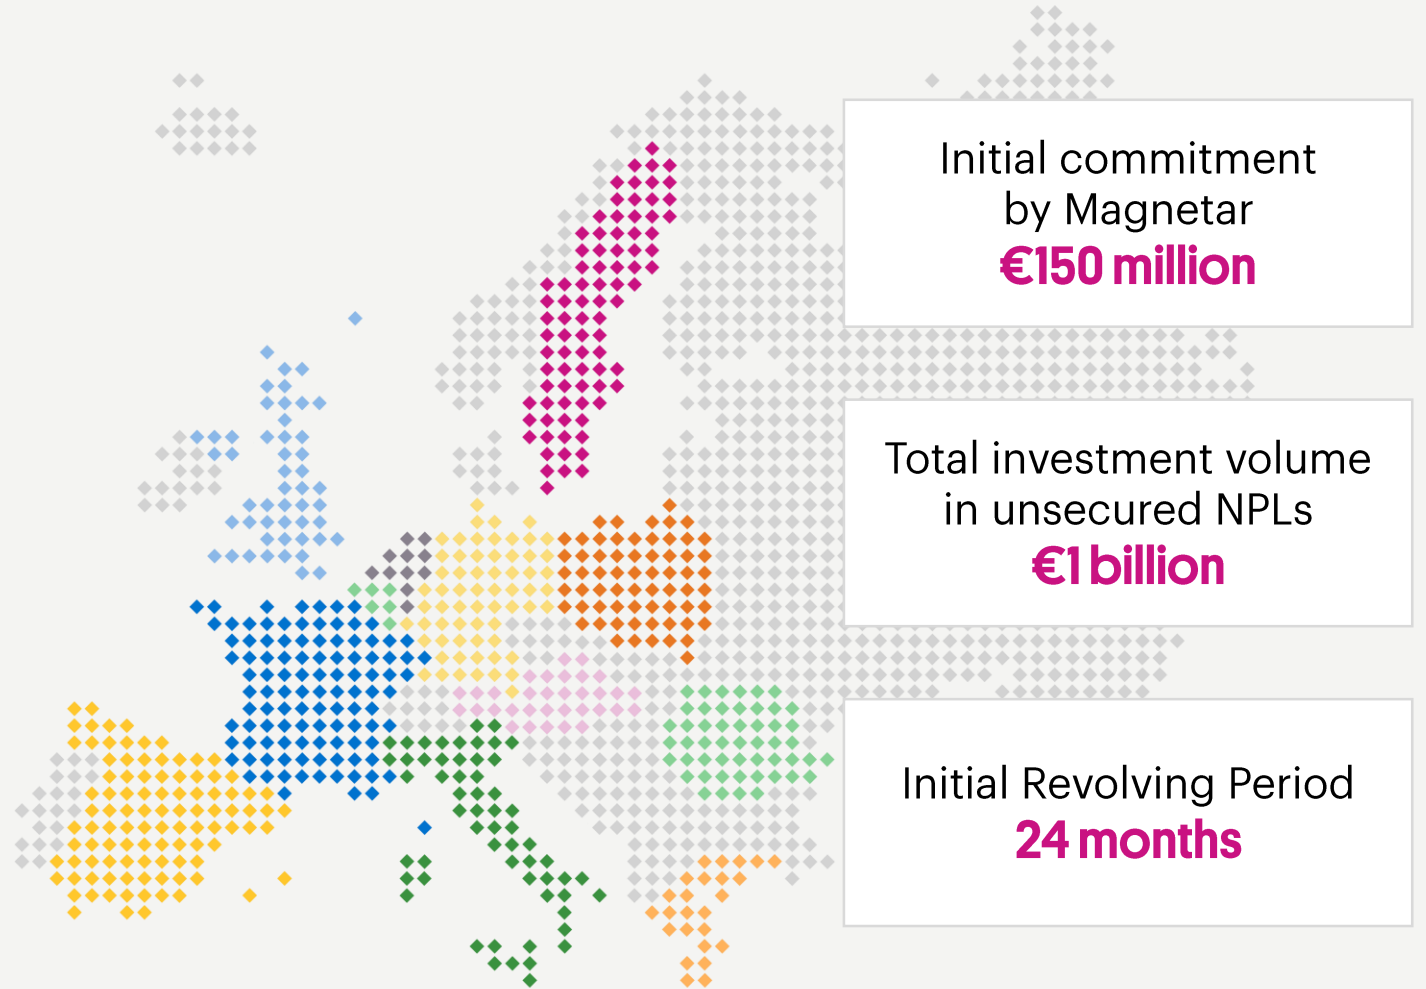

- » Securitisation of Italian unsecured NPL back book to release capital in 2019
- » First ever investment-grade rated deal involving solely unsecured NPLs
- » €337m of Class A, B and J Notes, backed by €5.0bn unsecured NPLs
- » Trade released capital and provided proof of concept for future transactions
- » Securitisation as preferred tool to mitigate regulatory challenges

Italian back-book securitisation

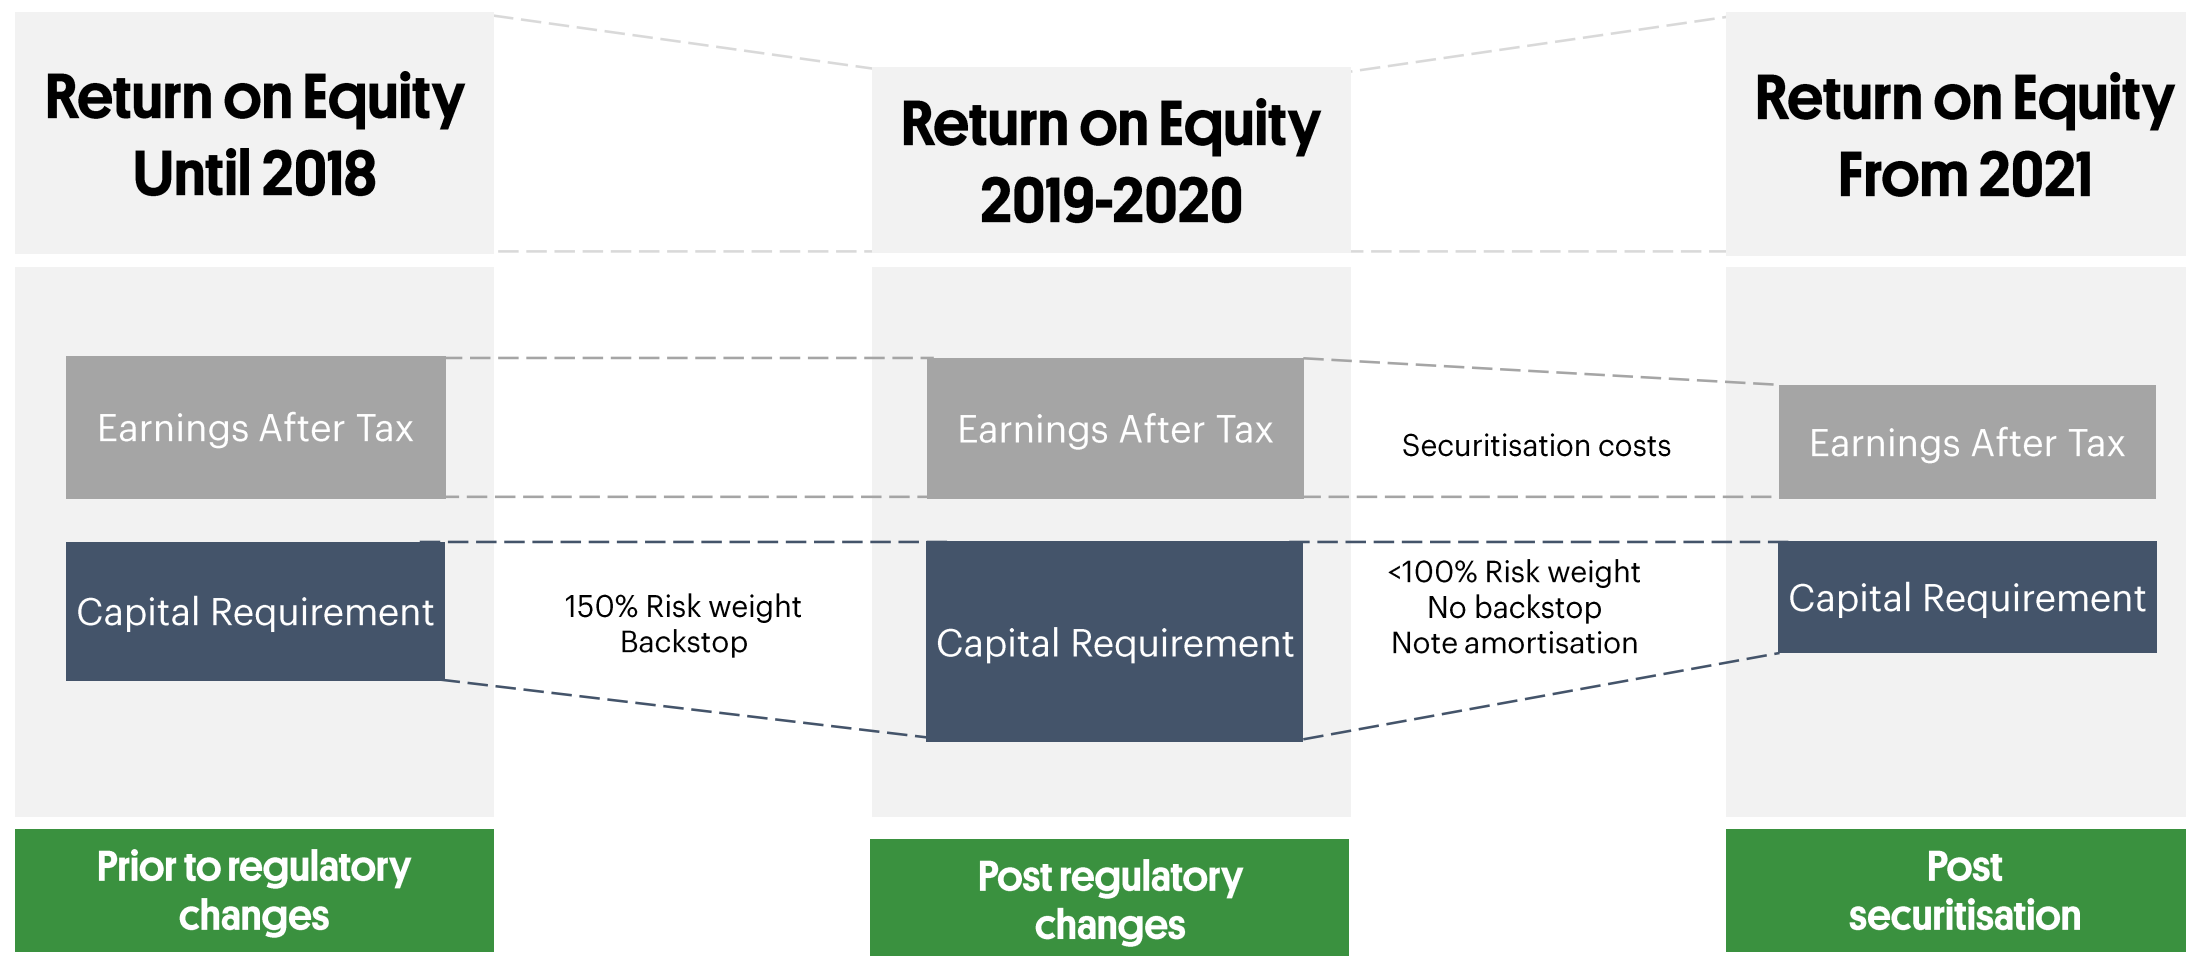

Pan-European securitisation partnership

- » Partnership with Magnetar, a leading structured credit fund, to launch the next phase of the securitisation program
- » Hoist Finance subscribe senior notes and Magnetar mezzanine and junior notes
- » Initial investment period of 24 months with initial Magnetar commitment of €150 million
- » Capacity to acquire up to €1 billion of unsecured NPL across all our jurisdictions

Back to normal with securitisation

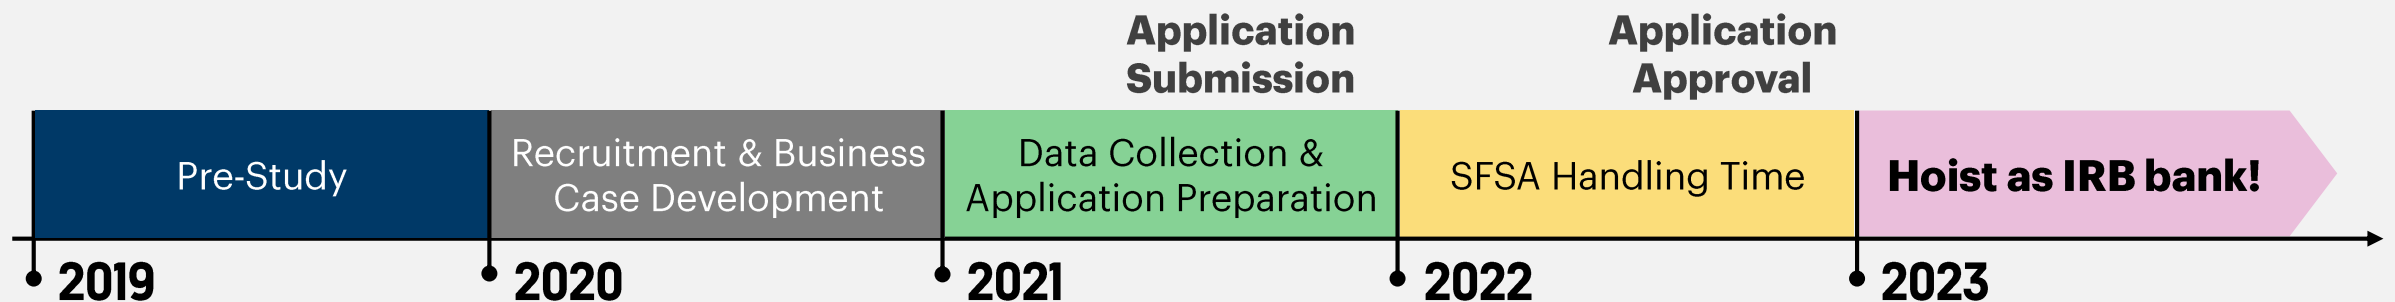

IRB program to further increase capital efficiency

Criteria

- » We have the largest NPL database amongst European banks (amount of data, length, quality and correlation)
- » Acquiring NPLs at a discount means significantly lower credit risk than standard approach
- » As a bank we have the required governance structures in place i.e. an independent risk function
- » Team of 8 experts drive the project on par with any large IRB bank

Benefits

- » **Expected risk weight reduction to below 100% for our back book**
- » **Immediate release of significant capital for redeployment to support our growth ambitions**
- » **Improved Risk Management and Governance**

Hoist Finance

Capital Markets Day 2021

Key messages

- » **Resilient performance through exceptional times**
- » **We remain focused on value creation**
 - Cost savings programme on track
 - New business lines add execution focus
- » **Funding and capital position which support growth**

Hoist Finance

Capital Markets Day 2021

Hoist Finance very well positioned for the future

Regulation remains a key competitive advantage

Benefits from being regulated

- ✓ Funding advantage
- ✓ High-quality control functions
- ✓ Diligent and rigorous processes
- ✓ Same regulated status as our banking clients
- ✓ Strong consumer protection
- ✓ Strong foundation to develop new products and services tailored to customer needs

**Regulated
since 1996**

Current topics

- ✓ In 2021, the SFSA will prioritise supervising the areas of consumer protection, anti-money laundering and risks that the pandemic may pose in the future
- ✓ European Commission's NPL Action Plan (see appendix)
- ✓ SFSA's updated methodologies and guidance for calculating Pillar II requirements

Updated financial targets

Return on Equity¹: **>15%**

Cost-to-Income: **<65%**

Regulatory

Continued focus on NPLs by the European Commission (EC)

On 16th of December 2020, the EC published its 2020 NPL Action plan: Tackling non-performing loans (NPLs) in the aftermath of the COVID-19 pandemic.

This plan (the “NPL Action Plan”) is a continuation of the process initiated in 2017 when the Council of the EU published their “*Council Conclusions on Action Plan to tackle non-performing loans in Europe*” (the “2017 Action Plan”) and the subsequent reports, proposals and legislation, which focused on increase NPL disposals by European banks driven largely to avoid a more onerous regulatory treatment of holding NPLs. The 2020 NPL Action Plan in contrast, focuses primarily on measures that, should they be effective, aim to make NPL disposals more attractive (or perhaps less costly) to execute for the banks.

The NPL strategy has four main goals (further detail on following pages):

1. **Further develop well-functioning markets for distressed assets** while ensuring further strengthen protection for debtors;
2. **Reform the EU’s corporate insolvency and debt recovery legislation**, which will help converge the various insolvency frameworks across the EU;
3. Support the **establishment of asset management companies** (AMCs aka ‘bad banks’) at EU level; and
4. Implement **precautionary public support measures**, where needed, to ensure the continued funding of the real economy.

Source: https://ec.europa.eu/info/publications/201216-non-performing-loans-action-plan_en

Hoist Finance supports the establishment of a strategy to address the issue of high NPL levels and we believe that we have an important role to play. A few detailed comments:

1. Hoist Finance agrees that fostering deeper secondary markets for NPLs will contribute to improved NPL flow management. In particular we welcome the improvements to the securitisation framework since NPL securitisation has become an integrated part of our business model and we of course appreciate that the EC wants to address regulatory impediments to NPL purchases by other banks and financial institutions, such as Hoist Finance.
2. AMCs have had a mixed perception in terms of successfully resolving NPLs. The debate regarding AMCs have been ongoing for quite some time and is expected to continue. If AMCs were to materialize we believe it could somewhat distort market prices and cause delays in NPL volumes.
3. As a pan-European debt management company, highly dependent on well-functioning judicial frameworks in the markets we operate, Hoist Finance naturally welcomes any improvements and harmonisation to insolvency, recovery and restructuring regimes.
4. Hoist Finance hopes and believe in a well-functioning secondary market to be able to ensure financial stability, so that that extreme measures as permitted in the context of BRRD are not required.

1. Further development of NPL markets

Development of secondary markets for NPLs represent a significant part of the Action Plan and the EU particularly highlights the following areas:

- Reach an agreement on the Commission's proposal for a **Directive on credit servicers**, credit purchasers and the recovery of collateral adopted in March 2018.
- Targeted improvements to the **securitisation framework for banks' non-performing exposures**, will enable the broader use of this tool by banks to free their balance sheets from NPEs. will enable the broader use of this tool by banks to free their balance sheets from NPEs.
- **Improving data quality and data comparability**, i.a. by updating the EBA data template (making them more proportionate and simple) in order to expand the use of the templates.
- Explore alternatives for establishing a data hub on NPL transactions at a European level, delivering more transparency and rendering markets more efficient.
- Develop guidance for NPL sellers on "best execution" sales processes for transactions, incl. e.g. information on the possible use of NPL platforms in the sales processes.
- **Address regulatory impediments to NPL purchases by banks**, i.a. by develop a more suitable approach for application of risk weights for purchased NPLs.

2. Insolvency, Recovery and Restructuring

Improving the insolvency framework constituted an important part of the 2017 Action Plan. However, at present the treatment of NPLs from the perspective of servicing, selling, acquiring and enforcing to realise collateral remains within the remit of national laws which vary by jurisdiction, with some being more creditor friendly and others offering more leniency and/or protection to debtors.

In the 2020 Action Plan, the EC;

- urges the European Parliament and the Council to swiftly reach an agreement on the legislative proposal for minimum harmonization rules on accelerated extrajudicial collateral enforcement (this will allow for legal certainty and recovery by both creditor and debtor).
- will, based on the benchmarking exercise of loan enforcement regimes which was part of the 2017 Council NPL Action Plan outlining an assessment of the efficiency of the legal framework in Member States in terms of defaulting or insolvents debtors, carefully analyse whether it is appropriate to make insolvency benchmarking a more regular exercise and continue the work on harmonisation of insolvency law regarding the opening of insolvency proceeds, ranking of claims, avoidance actions, tracing of assets in an insolvency estate and asset valuation as part of the Capital Markets Union (CMU).
- acknowledges that the “Recovery and Resilience Facility (RRF)” will incentivise and support reforms to reduce NPLs, in particular to improve the efficiency of national insolvency frameworks and administrative and judicial systems.

3. Asset Management Companies (AMCs)

Already as part of the previous 2017 Action Plan, the EC introduced a blueprint for setting up AMCs. The 2020 NPL Action Plan aims to further support the establishment and cooperation of AMCs acknowledging i.a. the following;

- AMCs can be very effective in certain specific circumstances, benefitting from economies of scale, centralisation of expertise and coordination.
- AMCs can be established with private or (partially) public funding in compliance with State Aid rules, but in order to be effective AMCs need to have sufficient capital to make a meaningful contribution to NPL volumes, which likely entails significant public funding and a State Aid assessment.
- A number of factors would make it difficult to set up a single European AMC. These factors include the diversity of NPLs and the different national rules on restructuring, insolvency and collateral enforcement. Consideration shall however be given to national AMCs and a cross-border network of AMCs at the EU level enabling exchange of best practices, experience and standardization.
- Reference is also made to Asset Protection Schemes (APS) such as GACS (in Italy) and Hercules (in Greece) which provide public support to NPL securitisation programmes (with approval as not being State Aid) as potentially being complementary to AMCs.
- Consideration of simplified approach to Real Economic Value (REV) in the context of applicable of State Aid rules for AMCs.

4. EU bank crisis management and state aid frameworks

The EC reiterates that market-based solutions should remain the first and primary tool for addressing NPLs. However, the EC further acknowledges that Member States through various policies have indirectly protected banks from potential credit losses and that authorities might need to be able to intervene in order to avoid impediments to the post-Covid economic recovery if there are indicators that the pandemic could cause distress to banks and pose financial stability concerns.

Consequently, the EU emphasises that;

- The Bank Resolution and Recovery Directive (BRRD) and State Aid framework provides for measures that can be taken in the event that financial institutions are “failing or likely to fail”.
- in the context of the crisis precipitated by Covid-19, the exceptional possibility of public sector financial support to provide precautionary recapitalisation of a bank without automatically triggering the status of “failing or likely to fail”, is available for solvent banks.
- Any such public financial support would nonetheless need to be compliant with the State Aid framework, and be sized based on the basis of a quantitative exercise such as a stress test.

Appendix

Definitions

Definitions

Acquired loan portfolios

An acquired loan portfolio consists of a number of defaulted consumer loans or debts that arise from the same originator.

Initial forecast

Estimated gross cash collections over 15 years at time of portfolio acquisition.

Active forecast

Initial forecast adjusted for portfolio revaluations. Basis for current valuation of portfolios.

CET1 capital

Capital instruments and the related share premium accounts that fulfil the requirements of Regulation (EU) 575/2013 of the European Parliament and the Council, and other equity items that may be included in CET1 capital, less regulatory dividend deduction and deductions for items such as goodwill and deferred tax assets.

Common Equity Tier 1 ratio

Common Equity Tier 1 in relation to total risk exposure amount.

C/I ratio

Total operating expenses in relation to Total operating income and Profit from shares and participations in joint ventures.

Earnings per share

Net profit for the period, adjusted for interest on capital instruments recorded in equity, divided by the weighted average number of outstanding shares.

Gross 180-months ERC

“Estimated Remaining Collections” – the company’s estimate of the gross amount that can be collected on the loan portfolios currently owned by the company. The assessment is based on estimates for each loan portfolio and extends from the following month through the coming 180 months. The estimate for each loan portfolio is based on the company’s extensive experience in processing and collecting over the portfolio’s entire economic life.

Portfolio revaluation

Changes in the portfolio value based on revised estimated remaining collections for the portfolio.

Return on Equity

Net profit for the period adjusted for accrued unpaid interest on AT1 capital calculated on annualized basis, divided by equity adjusted for AT1 capital reported in equity, calculated as an average for the year based on a quarterly basis.
